Portfolio — LinkedIn — GitHub

Professional Summary

Java Backend Developer with nearly 2 years of experience building Spring Boot applications, secure REST APIs, and MySQL-based backend systems. Experienced in designing production-style applications using layered architecture, JWT authentication, Hibernate/JPA, and RESTful services. Passionate about solving backend engineering problems while mentoring aspiring developers in Java and Spring Boot.

Technical Skills

Backend: Java 8+, Spring Boot, Spring Security, Spring Data JPA, Hibernate

Database: MySQL (Joins, Indexing, Query Optimization)

Core CS: Data Structures, OOP, Multithreading, Exception Handling

Dev tools: Git, GitHub, Postman, Maven, IntelliJ IDEA, VS Code
Deployment & Hosting: Vercel, Railway, Netlify, Hostinger

Concepts:

- REST API Design, MVC Architecture, DTO, Pagination, Validation
- JWT Authentication, Role-Based Access Control (RBAC), API Security

Experience

Java Backend Developer (Training & Mentorship)

Sep 2025 – Jan 2026

Anudip Foundation (Direct Employment)

- Designed and demonstrated Spring Boot backend applications covering REST APIs, JWT authentication, Hibernate/JPA, MySQL, and layered architecture.
- Mentored 300+ students in Java, Spring Boot, and backend system design.
- Diagnosed and resolved API failures, database issues, and performance bottlenecks.
- Conducted code reviews focusing on clean code, scalability, and DSA optimization.

Java Backend Developer (Training & Mentorship) (Third-Party Payroll)

Nov 2024 – Aug 2025

CertED Technologies (for Anudip Foundation)

- Delivered backend training and contributed to REST API development projects.
- Mentored 500+ learners in developing Spring Boot applications, debugging REST APIs, database integration, and backend best practices.
- Assisted in debugging real-world backend issues and improving API performance.
- Reviewed Java code focusing on clean architecture, exception handling, performance, and object-oriented design principles.

Projects

Personal Portfolio Website (Spring Boot, Angular, JWT, MySQL, Railway, Vercel)

Live Demo — Frontend GitHub — Backend GitHub

- Developed a responsive personal portfolio to showcase projects, skills, and experience.
- Built a contact form integrated with a Spring Boot backend for inquiry management.
- Developed an admin dashboard to view and manage contact messages.
- Deployed the Angular frontend on Vercel and Spring Boot backend on Railway.
- Integrated MySQL for persistent storage.

Secure Finance Dashboard API (Spring Boot, JWT, MySQL)

View on GitHub

- Built secure REST APIs using Spring Boot and Spring Security
- Implemented JWT authentication and role-based access control (ADMIN, ANALYST, VIEWER)
- Developed APIs for managing financial records with user-specific data isolation
- Designed dashboard APIs to calculate income, expense, and balance
- Integrated MySQL with JPA/Hibernate for data persistence
- Tested and validated APIs using Postman, handling edge cases like token expiry
- Secured endpoints using JWT filter and handled token validation and expiration

REST API with Pagination Validation (Spring Boot, JPA, MySQL)

[View on GitHub](#)

- Designed and developed RESTful APIs using Spring Boot and Spring Data JPA
- Implemented DTO pattern, validation, and global exception handling
- Built pagination and sorting for efficient handling of large datasets
- Wrote custom JPQL queries for optimized data retrieval
- Followed REST standards using proper HTTP status codes and ResponseEntity

Student Management System (Spring Boot, Hibernate, MySQL)

[View on GitHub](#)

- Developed backend system supporting CRUD operations with structured architecture
- Applied layered design and JPA integration for separation of concerns
- Implemented validation and exception handling
- Tested APIs using Postman

Data Structures & Algorithms

- Solved 200+ problems covering Arrays, Strings, Stack, Queue, Graph, Recursion
- Focused on time complexity optimization and edge case handling

Education

Bachelor of Engineering (Computer Engineering)

2024

Savitribai Phule Pune University, Pune

Additional Information

- Deployed projects using platforms like Hostinger and Netlify
- Maintained well-documented GitHub repositories with README, screenshots, and structure
